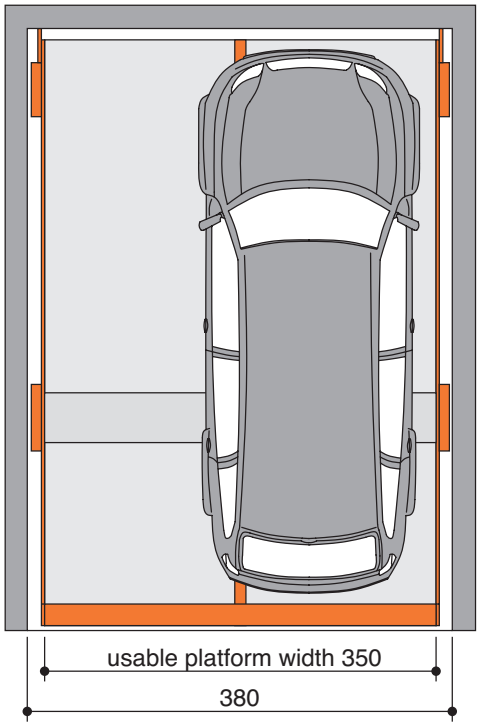
PRODUCT DATA

Disabled parking space

Parking for persons with limited mobility

Width dimensions



Specifications

Design according to GaVo (garage regulations) and recommendation DIN 18025 „Construction of accessible buildings – Design principles for dwellings“.

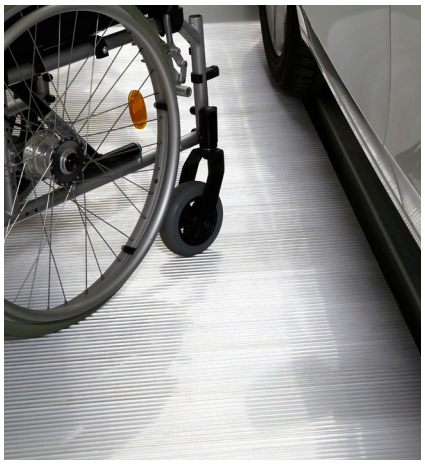
Only the upper platform is permitted to be used as parking space for handicapped persons.

Platform width: min. 350 cm.

The platform must be accessible horizontally (up to a max. incline of 1°).

Platform profile: AluLongLife on the upper platforms ensures better walkability and accessibility with wheelchairs.

Control element with key lock (special control element). The key can only be removed if the system is in lowered position. This ensures that the upper parking space can be provided for accessing anytime.



MultiBase 2072i / 2078i (disabled parking space)

Type

The MultiBase 2072i and MultiBase 2078i can be configured as disabled parking space.

Please refer to the relevant product data sheets, particularly regarding the required pit depths and heights, as well as th instructions for installation.
